Glock Pistol - Skilled Maintenance and Inspection

Purpose: A properly maintained and functioning duty handgun is paramount to the safety of officers and the public. This class will instruct individual officers in the nomenclature, function, stoppage diagnosis, and long-term maintenance of their own Glock firearms. Officers will learn to detail strip and inspect their weapons for proper cleaning and wear inspection. They will learn about preventive maintenance and parts replacement schedules to keep their weapons duty-ready. Officers will learn to troubleshoot and resolve function issues should they arise.

Required Equipment to bring:

- Unloaded Glock pistol that should be test-fired before return to duty use
- eye protection (MANDATORY)
- cleaning cloth
- small bottle of lube
- lunch/drinks for the day

Toolkit is included in cost of class.

NOTE: No live handgun ammunition is allowed in the training area. All loaded carry pistols and magazines will be secured in their holsters in a separate area of the training room. Class handguns must be in an unloaded condition prior to entry.
