Tactical Urban Operation Planning and Considerations Course

This course equips participants with the knowledge, skills, and competencies required for effective integration of tools into High-Risk Tactical Urban Operations. Attendees will be trained to utilize the full spectrum of K9 capabilities during search operations and to communicate efficiently with supplementary assets such as air platforms, SUAS resources, perimeter officers, other agencies, and additional K9 units. The objective is to inform tactical team members, K9 handlers, SUAS operators, and tactical team leaders—who may support these operations—on methods for collaborating effectively to optimize operator safety and improve the probability of mission success.

GOALS & OBJECTIVES

- Hasty Mission Planning
- To identify the capabilities of a canine team during tracking/area search operations.
- Urban Search Considerations
- Integration of Assets (SUAS, ATAK, Tactical Team, etc.)
- Actions on Objective and React to Contact Drill
